Professional Summary

Workday Analyst with 1 year of consulting experience, focused on Workday Integrations and Extend application development. Proficient in designing and building integrations using Core Connectors and Enterprise Interface Builder (EIB). Certified Workday Extend Consultant with hands-on expertise in developing and designing custom Extend applications. Strong knowledge of Workday HCM functional management, including configuration and administration. Skilled in customizing Workday integrations using XSLT and JSON for advanced data transformation. Experienced in managing global Workday environments with reporting structures and direct report oversight. Practical experience with APIs, scripting, and JSON in the development of Workday Extend applications. Solid foundation in both Workday HCM and Integrations, with formal training in both areas. Competent in integration testing and validation to ensure functionality, performance, and data accuracy. Hands-on experience in AMS projects, including issue resolution and development of new Workday integrations.
